

SILAGE BENEFITS

Good Quality & Stability

24 x 7 x 365

Available throughout the year

Increase in Milk Yield

Better Health & Re-productivity

Concentrated feed at affordable price

Efficient Space management through high-compaction

Top quality cattle feed to ensure high yield & good quality milk throughout the year.

CORNEXT SILAGE

Highly nutritious feed for cows, buffaloes, goat & sheep

D.No. 18-18-145/A, Mufti Street, Ganji Bazaar Centre, Guntur, Andhra Pradesh, INDIA - 522003.

CORN SILAGE

Highly nutritious cattle feed with more than 12 months shelf-life

www.cornext.in

WHAT IS SILAGE?

Silage is any grass, such as corn or millet crop, any other plant that is chopped into small pieces, added inoculant agents and compacted together in a silo, bunker, bags, or made into bales. Silos and bunkers are for large captive consumption, whereas bags and bales are smaller chunks of silage which can be easily transported to various farms. The inoculating agents ferment the forage to provide feed for livestock and keep it edible.

Cornext uses world-class technology to produce highest quality Baled Corn Silage'

Finely chopped Maize crop

COMPARISON OF VARIOUS CATTLE FEEDS

Particular	Silage Bales	CO4/CO3	Paragrass	Maize/ Sorghum
365 days availability	Yes	No		
Handling	Easy	Labour Intensive		
Preservation	1 Year	2 - 3 days		
Dry Matter (DM)	35%	15-20%	15%	25%
Protein (%DM)	8-9%	6-7%	3-4%	7-8%
Moisture Loss per day	No	15-20%	15-20%	15-20%
Wastage	2-3%	10-20%	10-15%	15-20%

Top quality packaging using latest silage baling technology

CORN SILAGE

Corn Silage is one of the best green fodders used in dairy industry across the world. It is very nutritious animal fodder with 8-9% protein and 3000 Kcal /kg digestible energy. The quality of our silage is superior to any available green grass.

HOW TO MAKE SILAGE BALES

HARVESTING

Finely chopped high quality maize with 30-35% dry matter

INNOCULATION

Improves Fermentation
Increase Digestibility

COMPACTION

High density compaction
More feed in less space

PACKAGING

Wrapping with high quality Polypropylene film; UV protection

STORAGE

Shelf Life up to 12 months
